Description :

- **G&L Technologies MPS-44 Louver Production Machine**

Microprocessor controlled automated System to perform louver cutting accurately and swiftly, while eliminating much of the edge fraying. The system consists of a hopper feed and servo controlled index system to process your plastic, wood or composite louver materials.

Matches production rate of (2) G&L TECHNOLOGIES LPS-36T!

System Benefits:

Tandem blades virtually eliminate edge fraying
Servo drive for absolute positioning ensuring length accuracy
utilizes infeed and outfeed hoppers for stand-alone operation
multiple jobs can be programmed at once, freeing the operator for other tasks
Accepts random lengths of material
system monitors and displays material yield and production data

System Features:

User-friendly touch-screen for ease of programming
self-centering bed accepts all tapered or flat profiles
can run in manual mode or automatic mode
