Description :

- **ELGI EGRD 500 Refrigerated Air Dryer (480 CFM)**

The ELGi EGRD 500 refrigerated dryer is designed to provide a constant 41°F dew point and utilizes the latest advancements in refrigeration technology to provide low operating cost and years of trouble-free performance.

The advanced "ALU Dry" aluminum heat exchanger module enables the packaging of the pre-cooler, evaporator, separator, and reheater all in one compact unit. This reduces the size, weight and pressure drop associated with conventional exchangers and optimizes the overall performance and reliability of the dryer which ensures effective removal of condensed liquids regardless of flow.

Features:

- Microprocessor Controls with Dew Point Display Indication
- All-In-One Aluminum Design Exchanger
- Low-Pressure Drop
