Description :

- **CAM-WOOD SFJ-460L FINGER JOINT ASSEMBLY & CUTOFF SAW SYSTEM With Gluing**

Description:

- The SFJ-460L is an automatic Assembly System, Cutoff Saw, and Press. The system performs three functions; pre-assembles finger jointed blocks with glue previously applied in the FSG 150 manual Glue Applicator, cuts the assembled boards to length, and performs the final assembly when pressed by a powerful hydraulic system. When pressing is complete, boards are fed out of the Press.
- Power feed for feeding boards, stops automatically at the desired board length using the included cut-off saw as standard equipment for cutting boards to length.
- The maximum assembled board length is 15'.
