#### Description :

- LATERAL CHAIN FEED TABLE, CMS 16. The lateral chain feed table will feed material 3" to 10" wide, 3' to 16' long and from 1" to 3" thick.
- Variable feed speeds of 50 to 200 FPM. The fence is adjustable throughout a 3/4" range for alignment with downstream equipment.
- (6) 30" Long, low friction steel flat top infeed chains provide long life non-marking transport, and are driven by a 1 HP gear motor.
- (3) Powered feed rolls are smooth steel, non-marking, and are driven by a 2 HP gear motor.
- Rolls and chains are controlled by variable speed drives.
- The (3) pinch rollers are 5" diameter urethane covered. The first (1) pinch rollers are powered by individual 2-1/2" bore air cylinders to singulate pieces into the 2' bridge, and (1) roll keeps the board moving on the bridge.
